SuperPaint Documentation

Description

SuperPaint is a very simple and very basic to operate light paint program. All the features you need to be able to do some quick and easy touch ups on existing images. Designed for beginners and also for the times when you need a quick and simple program to draw a simple image.

User interface requirements

The application can run on any hardware which supports windows 7 or later. The system must have at least 100MB of free disk space to install the program and recommended minimum of 1GB of memory to load the application.
